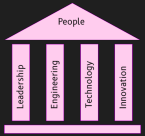
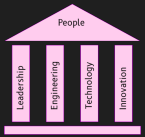
- medicine
- surveillance



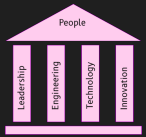
On Research



[1]https://en.wikipedia.org/wiki/Plan_9_from_Bell_Labs

On Research

Plan 9 from Bell Labs [...] originated from the Computing Science Research Center (CSRC) at Bell Labs[1]

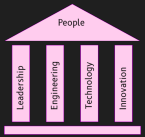


[1] https://en.wikipedia.org/wiki/Plan_9_from_Bell_Labs

On Research

> *Plan 9 from Bell Labs […] originated from the Computing Science Research Center (CSRC) at Bell Labs*[1]

Yay research! Great results came out of it.



[1] https://en.wikipedia.org/wiki/Plan_9_from_Bell_Labs

On Research

> *Plan 9 from Bell Labs […] originated from the Computing Science Research Center (CSRC) at Bell Labs*[1]

Yay research! Great results came out of it.

Many ideas have been ported to other systems.

On Research

> *Plan 9 from Bell Labs […] originated from the Computing Science Research Center (CSRC) at Bell Labs*[1]

Yay research! Great results came out of it.

Many ideas have been ported to other systems.

Not necessarily in the exact same fashion.

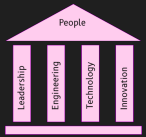
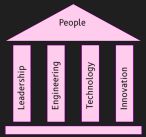
On Interfaces



On Interfaces

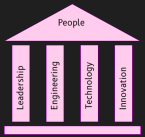
Simple? Easy to create != easy to consume!



On Interfaces

Simple? Easy to create != easy to consume!

“API” - often not application, not even programming



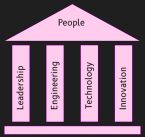
On Interfaces

Simple? Easy to create != easy to consume!

“API” - often not application, not even programming

```
echo 1 > foo
```

(nothing exciting)



On Interfaces

Simple? Easy to create != easy to consume!

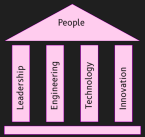
“API” - often not application, not even programming

```
echo 1 > foo
```

(nothing exciting)

```
echo 1 > /dev/led
```

Huh? Do I write a “1” on a physical file to turn on light?



On Interfaces

Simple? Easy to create != easy to consume!

“API” - often not application, not even programming

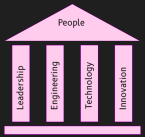
```
echo 1 > foo
```

(nothing exciting)

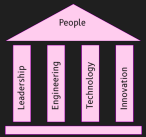
```
echo 1 > /dev/led
```

Huh? Do I write a “1” on a physical file to turn on light?

```
vim /dev/null
```



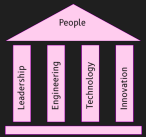
CLI / POSIX



CLI / POSIX

`wget` vs `curl`

- “do one thing and do it well”?
- write to stdout vs current dir
- `-o` vs `-O` to specify output file



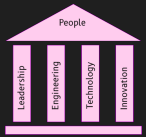
[2] https://pubs.opengroup.org/onlinepubs/009695399/basedefs/xbd_chap12.html#tag_12_02

CLI / POSIX

`wget` vs `curl`

- “do one thing and do it well”?
- write to stdout vs current dir
- `-o` vs `-O` to specify output file

What is the meaning of a single `-`[2]?



[2] https://pubs.opengroup.org/onlinepubs/009695399/basedefs/xbd_chap12.html#tag_12_02

Does `wget` take a URL from stdin or write data to stdout?

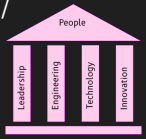
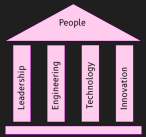
Drivers From Outer Space - Fast, Simple Driver Development

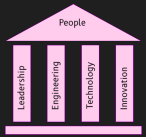


The Web



The Web

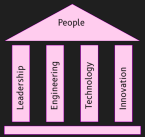
The thing that started as a platform for documents…



The Web

The thing that started as a platform for documents…

… has turned into a platform for applications.

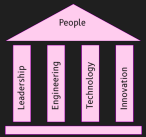


The Web

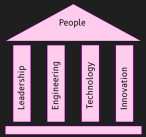
The thing that started as a platform for documents…

… has turned into a platform for applications.

Let’s embrace it and push it further down!

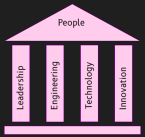


WebGAP (Web General Application Protocol)



WebGAP (Web General Application Protocol)

NOTE: There is no implementation yet. This is a concept.

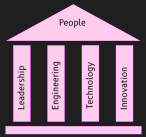


WebGAP (Web General Application Protocol)

NOTE: There is no implementation yet. This is a concept.

Idea

Deploy Wasm code as apps to any gadget, such as a wristband, a camera, a doorbell, a fridge…

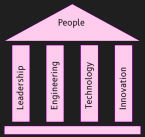


WebGAP (Web General Application Protocol)

NOTE: There is no implementation yet. This is a concept.

Idea

Deploy Wasm code as apps to any gadget, such as a wristband, a camera, a doorbell, a fridge…
Let that serve back apps to consume the gadget again.

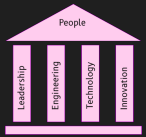


WebGAP (Web General Application Protocol)

NOTE: There is no implementation yet. This is a concept.

Idea

Deploy Wasm code as apps to any gadget, such as a wristband, a camera, a doorbell, a fridge…
Let that serve back apps to consume the gadget again.
Make use of existing runtime environments, such as a web browser or desktop, draw simple graphics, similar to DEC ReGIS, take it further.



WebGAP (Web General Application Protocol)

NOTE: There is no implementation yet. This is a concept.

Idea

Deploy Wasm code as apps to any gadget, such as a wristband, a camera, a doorbell, a fridge…
Let that serve back apps to consume the gadget again.
Make use of existing runtime environments, such as a web browser or desktop, draw simple graphics, similar to DEC ReGIS, take it further.

- WebAssembly is widely available and used in all sorts of scenarios
- WebSerial lets you use a serial port from the web browser
- define (app specific) protocols
- can also be used in a simpler environment

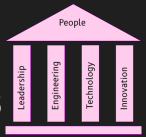
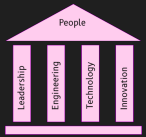
Have you heard of “Wasmlet”s?
https://twitter.com/wasm3_engine/status/1465294919422119936

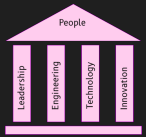


WebALE (Web Application Launch Environment)



WebALE (Web Application Launch Environment)

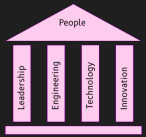
You know the app launcher from your phone.



WebALE (Web Application Launch Environment)

You know the app launcher from your phone.

Desktop icons have always been similar.

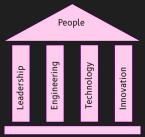


WebALE (Web Application Launch Environment)

You know the app launcher from your phone.

Desktop icons have always been similar.

How about drawing the launcher, just like `drawterm`?



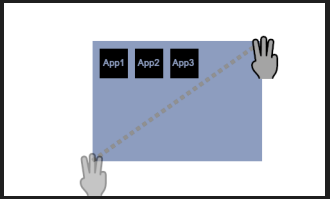
WebALE (Web Application Launch Environment)

You know the app launcher from your phone.

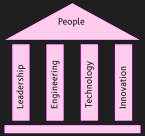
Desktop icons have always been similar.

How about drawing the launcher, just like `drawterm`?

Touch friendly variant: draw a diagonal with 3 fingers.



Add an intermediate step for establishing a connection to and dropping your initial app onto a remote gadget.



Platform System Interface

The *Platform System Interface* project (PSI) is a collection of design ideas, specifications, tools and other resources all around hardware platforms, firmware, bootloaders, OS interfacing and user experience.

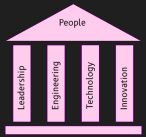
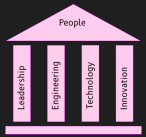
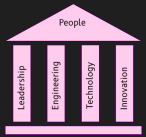
DEMO



Rust and WebAssembly

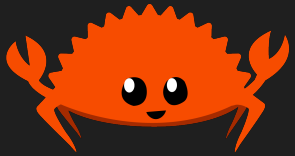


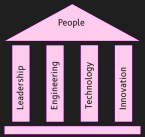
What if…



What if…

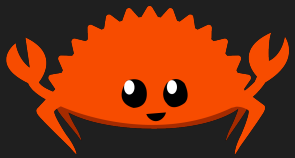
… we compile Rust…



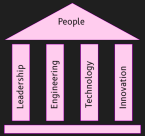


What if…

… we compile Rust…

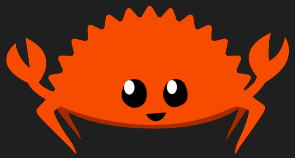


… to Wasm…



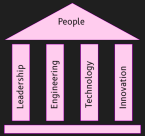
What if…

… we compile Rust…



… to Wasm…

… and use it in an app?

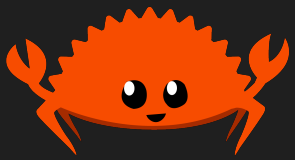


What if…

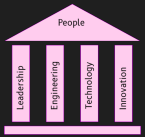
… we compile Rust…

… to Wasm…

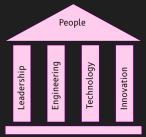
… and use it in an app?



Magic happens - we can use native code on web platforms!



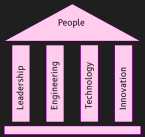
Howto



Howto

Getting started

https://lannonbr.com/blog/2020-01-07-rust-wasmpack/
https://rustwasm.github.io/docs/wasm-pack/



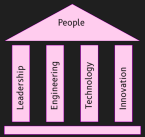
Howto

Getting started

https://lannonbr.com/blog/2020-01-07-rust-wasmpack/
https://rustwasm.github.io/docs/wasm-pack/

TL;DR

```
cargo install wasm-pack
wasm-pack new my-rust-wasm-foo
```



Howto

Getting started

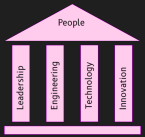
https://lannonbr.com/blog/2020-01-07-rust-wasmpack/
https://rustwasm.github.io/docs/wasm-pack/

TL;DR

```
cargo install wasm-pack
wasm-pack new my-rust-wasm-foo
```

The glue

https://github.com/wasm-tool/wasm-pack-plugin
https://rustwasm.github.io/docs/wasm-pack/tutorials/hybrid-applications-with-webpack/using-your-library.html



Howto

Getting started

https://lannonbr.com/blog/2020-01-07-rust-wasmpack/
https://rustwasm.github.io/docs/wasm-pack/

TL;DR

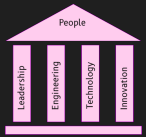
```
cargo install wasm-pack
wasm-pack new my-rust-wasm-foo
```

The glue

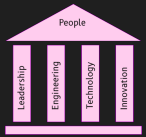
https://github.com/wasm-tool/wasm-pack-plugin
https://rustwasm.github.io/docs/wasm-pack/tutorials/hybrid-applications-with-webpack/using-your-library.html

More glue

```
cargo add gloo-utils
```



The Rust side



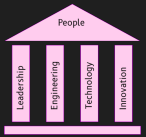
The Rust side

```rust
extern crate wasm_bindgen;
use gloo_utils::format::JsValueSerdeExt;
use serde::{Deserialize, Serialize};
use wasm_bindgen::prelude::*;

/// ...

#[derive(Serialize, Deserialize)]
struct Foo {
    bar: u32,
    baz: String,
}

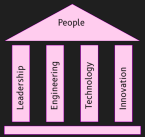
#[wasm_bindgen]
pub fn some_fun(data: JsValue) -> JsValue {
    /// ...
    let foo = Foo::new { bar: 42, baz: "Rust Wasm" };
    JsValue::from_serde(&foo).unwrap()
}
```



The JavaScript side

```
import { some_fun } from "./rs/pkg";

/* ... */
    const res = some_fun({ woopWoop: 1337 });
    console.info(res);
/* ... */
```

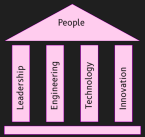


The JavaScript side

```
import { some_fun } from "./rs/pkg";

/* ... */
    const res = some_fun({ woopWoop: 1337 });
    console.info(res);
/* ... */
```

But that is synchronous and blocking!



The JavaScript side

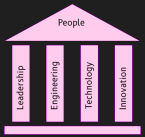
```
import { some_fun } from "./rs/pkg";

/* ... */
    const res = some_fun({ woopWoop: 1337 });
    console.info(res);
/* ... */
```

But that is synchronous and blocking!

https://rustwasm.github.io/wasm-bindgen/reference/js-promises-and-rust-futures.html

https://rustwasm.github.io/wasm-bindgen/api/wasm_bindgen_futures/



Thanks! :)
